

## Call for Papers

### The Energy Field of the Future

The Society for Underwater Technology, The Hydrographic Society UK and Ireland (THS: UK&I) Scotland Branch and The International Marine Contractors Association are jointly holding our well-respected joint industry seminar in **November 2022** in Aberdeen, UK.

The energy industry is currently experiencing a period of significant change, with ever increasing focus on sustainability, while marine and underwater technologies continue to advance. With this scale of change ongoing, what does the field of the future look like, and how close are we to achieving 'Net Zero' targets? What transformative technologies and strategies will have the greatest impact to: operational efficiency, value creation, and Net Zero operations? How do we accelerate the integration of these solutions within our existing offshore assets?

#### Topics of interest will include (but not limited to)

<b>Autonomy</b>	<b>Alternative fuels</b>
<b>Electrification</b>	<b>Energy transition</b>
<b>Communication</b>	<b>Net Zero operations</b>
<b>Remote inspection</b>	<b>Subsea chemical storage / deployment</b>
<b>Cloud Computing &amp; Data analytics</b>	<b>Subsea energy storage</b>

Abstracts of 150 words are invited considering the above topics of interest to members of all three societies, with the aim of providing a 20-minute presentation.

Abstracts should be submitted to [callforpapers@sut.org](mailto:callforpapers@sut.org) by **17th August 2022**

All submissions will be acknowledged, and speakers advised by **31<sup>st</sup> August 2022** if their abstract has been accepted. Note: Sponsorship opportunities also exist with the option to deliver an elevator pitch. For more information contact [callforpapers@sut.org](mailto:callforpapers@sut.org)
