

CALL FOR PAPERS

Deadline 6th June 2025

On behalf of the International Hydrographic Societies (IFHS) and The Hydrographic Society UK & Ireland (THS:UKI), we are delighted to be hosting the [HYDRO 2025](#) in the maritime city of Liverpool, situated in the North West of England.

The [HYDRO 2025](#) International Conference and Exhibition will be held at the [Rum Warehouse, Titanic Hotel Liverpool](#) on the **28th - 30th October 2025** and will bring together the global seabed mapping community. The conference provides a platform for professionals, researchers, and students to share innovative research, technological advancements, and best practices in the field of hydrography and seabed mapping.

Experts from authorities, industry, service providers, and research institutions, will have the opportunity to discuss the latest advances in hydrography and its impact on marine surveying, navigation, maritime safety, environmental protection, and sustainable development.

The conference programme will feature sessions dealing with recent technological advances, arising hydrographic topics, technical and scientific sessions, keynote presentations, workshops, and networking opportunities, covering a wide range of hydrographic topics.

The organising committee of [HYDRO 2025](#) is pleased to invite you to submit an abstract for proposed presentations at the conference. We hope you will share your experiences and present your innovative ideas and technologies. Presentations focussing on innovation, applications and those featuring case studies would be of particular interest.

Abstracts are particularly welcome from students and recent graduates, with opportunities available for supported delegate places to several submitted presentations from students and early career professionals.

In addition to the conference programme, [HYDRO 2025](#) will feature a stimulating exhibition and waterside demonstrations showcasing the latest hydrographic products, services, and technologies. This is an excellent opportunity to network with leading hydrographic suppliers and learn about the latest innovations in the field.

HYDRO 2025

28TH - 30TH OCTOBER
LIVERPOOL

Author Instructions

Abstracts should include a title (up to 100 characters) and a 300-word synopsis which must be accompanied by a biography and head and shoulder photograph of each author, along with details of their role and organisation(s).

Abstracts must be submitted to event@ths-uki.org by **6th June 2025**.

All abstracts will be reviewed, and successful authors will be notified of their abstract acceptance by **1st August 2025**. On receipt of acceptance, authors must confirm their intent to present in person through the purchase of the relevant delegate ticket. Please note, **THS:UKI** will not be able to cover the cost of travel, accommodation, or subsistence.

Presentations will be selected on relevance to the seabed mapping community, originality, and quality. Please bear in mind that this is a learned technical conference. Abstracts and presentations which are purely product based or overtly commercial in nature will not be considered.

All authors will be expected to grant joint copyright of the presentations to **THS:UKI**. It is the responsibility of the author(s) to obtain copyright permission(s), as necessary, for material in both their abstracts and presentations.

We also invite abstracts for poster presentations.

In addition, we offer the opportunity to publish a corresponding conference paper (typically 2,000 -3,000 words) in *soundings*, the **THS:UKI** quarterly publication. If you wish to publish a conference paper, the final version must be submitted by **19th September 2025**.

If you are interested in publishing a peer-reviewed article, please consider submitting your work to event@ths-uki.org by **31st December 2025**.

Further HYDRO 2025 Information:

Delegate registration, sponsorship and exhibition opportunities plus lots more exciting information will shortly be available on our [HYDRO 2025](#) webpage.

We look forward to your contribution and to welcoming you to an engaging and insightful HYDRO 2025 in Liverpool.
